

Shermac Engineered Equipment Transitions has been designing and manufacturing built-for-purpose, quality-assured mine spec vehicles, cartage trailers and service trucks since 2002 and has earned a reputation for providing quality products to the mining, construction and earthmoving related industries.

Shermac Engineered Equipment Transition management is totally committed to supplying these products and services to meet and exceed customer's and relevant interested parties' requirements and expectations ensuring complete satisfaction.

Shermac Engineered Equipment Transition has documented to quality management system that complies with the requirements of ISO 9001. The documented system ensures that all activities associated with the manufacture and delivery of the end product are properly identified, controlled, managed and effective corrective action introduced should failings become apparent.

All employees are to take responsibility for implementing the quality management system within the limits of their work areas and are encouraged to actively contribute to the continual improvement of the quality management system.

Business objectives and targets are established by Managing Director and progress is monitored and communicated to staff through meetings and notices

Shermac Engineered Equipment Transition is committed to continual improvement of quality management system and compliance with relevant legislation.
