## ROADSERVE 3000 WATER CART

## EXPERIENCE THAT'S DRIVING A NEW ERA IN VEHICLE ENGINEERING

At Shermac, we've been engineering and manufacturing custom service vehicles and water cartage vehicles for Australia's mining, civil and construction sectors since 2002.

We've earned a deserved reputation for excellence among heavy industry and government organisations alike. But it's not purely the quality, reliability and functionality of our high-performance vehicles that have driven our ongoing growth and the evolution of our range.

Nor is it simply our design, engineering and manufacturing expertise.

It's more fundamental than that.

Listening, evolving, solving.  
The most crucial skill in our proven engineering process is the ability to listen and build relationships.

This is what underpins our expertise in designing and delivering cost-effective, quality-assured solutions that drive performance capacity and add tangible operational and strategic value.

It's the foundation of our global sourcing and procurement network, which gives our clients access to the largest range of high quality products at the lowest fleet and bulk-purchasing prices.

And it's why we now have three distinct divisions, each dedicated to meeting the unique needs of different industries across Australia.

## THE SHERMAC WATER CART RANGE PERFORMANCE. RELIABILITY. FLEXIBILITY.

Shermac is one of Australia's leading manufacturers of water carts for the mining, civil and commercial industries.

Our water carts are built to handle any challenge, and are custom designed and extensively tested to ensure optimum weight distribution and performance on any chassis, no matter how tough the environment or challenge.

From smaller on-road water carts, semi's, and through to the large off-road water carts, all of our water trucks are engineered to your unique technical specs, giving you the freedom to custom-configure your vehicle to suit your practical requirements and augment your fleet.

We pride ourselves in being able to offer solutions to our clients, by listening closely to their needs, and designing and building service vehicles to best suit their operational and budgetary requirements. With this approach, our aim is to help our clients save costs, increase production, and most importantly increase their bottom line.

YOUR unique requirements!

## USABILITY

Our water carts are ergonomically designed to be easy to use and maintain, with useful features such as single point greasing and simple spray heads that give an clean, even spray, making life easier for operators. All water and hydraulic pipework is externally mounted for ease of servicing.

## WATER APPLICATION SYSTEMS

Our water application systems include adjustable left and right batter sprays, horizontal central fan sprays, water cannons, customized dribble bar options, and scope for any additional custom spray kits you may require.

## FLEXIBILITY

Our semi water trucks are engineered to your unique technical specs, giving you the freedom to custom-configure your vehicle to suit your practical requirements and augment your fleet.

## FULL DRAINAGE

Shermac's semi water carts are designed to ensure the tank is able to completely drain dry, meaning full tank capacity is used for each load.

## SAFETY

All of our trucks are built in Australia, to Australian Standards and your specific safety and mine-spec requirements. Optional features such as fire extinguishers, high-vis tape, wheel chocks, handrails and ladders fitted to access the top of tank with anti slip grips and treads are just the beginning.

## SINGLE POINT SERVICING

Our semi's are built with a unique single-point servicing feature, meaning there is just one convenient location for all your grease points.

## RELIABILITY

Our heavy duty semi water cart design is engineered to be robust enough for demanding conditions while providing excellent weight distribution for efficiency.

## IN-CAB CONTROLS

We offer the option of a conveniently mounted in-cab spray and cannon control panel, providing total operating control from the comfort of the cabin.

YOUR unique requirements!

## SUPERIOR LINING/PAINT PROCESS

Specify your vehicle's colour. We gritblast and paint our water carts to the highest industry standards, including a two-pack paint system internally and externally, with optional corrosion protection systems for operation in corrosive site conditions.

## QUALITY COMPONENTS

The components used in Shermac's semi water carts are all procured from Australian suppliers, to ensure they're of the highest quality and that spare parts are readily available if required.

## LOW CENTRE OF GRAVITY

Our water tankers are extensively tested to ensure optimum weight distribution and performance, no matter how tough the environment or challenge. They are designed with a low centre of gravity, for increased stability and safety for peace of mind for both managers and operators alike.

## OSCILLATING TURN TABLE PLATE

Our tanks are fitted with an oscillating turn table plate, eliminating any torsional stress on the tank.

## WHEEL GUARDS

Our robust rubber wheel guards provide another level of go-anywhere-do-anything protection for our tough and durable semi water carts.

## WATER PUMP

We fit Southern Cross close-coupled pumps to all of our semi tankers. These are a quality pump, with optimum performance.

## MULTI-COMBINATION COMPATIBLE

Shermac's semi water carts are set up to couple any road train setup easily.

## ADDITIONAL OPTIONS

We provide a range of additional options that enable you to create the perfect water cartage solution, every time. These options include: work lights kit, reverse cameras, hose reels, deep lug tyres, beacons, spare tyre carriers, foam injection systems for water cannon..... and more!

## TESTIMONIALS

*"Outstanding product working in some of the most hostile environments. Fantastic build quality & excellent back up service. Highly recommend the Shermac team."*

*"We recently purchased an 8x4 Watercart from Shermac. Couldn't be happier with their service and the quality of the product speaks for itself. Highly recommend."*

*"Well, Built – The trailers supplied were of a good solid build."*

*"Great People , Great Service , Great Product."*

*"Great company to deal with, very professional in all aspects of the contract, superb quality and workmanship, would highly recommend them."*

*"The end product was exactly how we hoped it would be delivered. Sales and Production were very easy to deal with, listening to what we required and delivered the product on time, as per quote and built to a quality standard we expected."*

*"Shermac design vehicles differently. They have a knack for being able to reconfigure a truck so that, for example, where additional fuel tank capacity but less oil might be needed, they can come up with a design that provides this."*

*"Shermac were professional and knowledgeable throughout the whole quote, design and build process. They were fully accountable for the build and delivered it on time, to budget and with great quality."*
