PRODUCT PORTFOLIO

EXPERIENCE THAT'S DRIVING A NEW ERA IN VEHICLE ENGINEERING

At Shermac, we've been engineering and manufacturing Built For Purpose service vehicles and water cartage vehicles for Australia's mining, civil and construction sectors since 2002.

We've earned a deserved reputation for excellence among heavy industry and government organisations alike. But it's not purely the quality, reliability and functionality of our high-performance vehicles that have driven our ongoing growth and the evolution of our range.

Nor is it simply our design, engineering and manufacturing expertise.

It's more fundamental than that.

Listening, evolving, solving.
The most crucial skill in our proven engineering process is the ability to listen and build relationships.

This is what underpins our expertise in designing and delivering cost-effective, quality-assured solutions that drive performance capacity and add tangible operational and strategic value.

Our core values build the foundation of our global sourcing and procurement network, giving our clients access to the largest range of high quality products at lowest fleet and bulk purchasing prices.

With our three distinct divisions each dedicated to meeting the unique needs of different industries across Australia, Shermac is well positioned to provide clients with an effective, efficient, safe, and easy to use product.

OFF-ROAD SERVICE TRUCKS

FIELD SUPPORT AND MAINTENANCE

Shermac understand the need for maximum efficiency, minimum operating costs, and utilising every minute of production you can get. We pride ourselves in delivering complete customer satisfaction, by offering service and support for our custom-built vehicles in the field.

We source and stock an extensive range of parts and accessories, all procured from Australian suppliers ensuring the best quality. Our long-standing relationships with trusted suppliers means we are able to negotiate the most competitive prices for you.

We ensure you get the parts you need, when and where you need them.

Safety and productivity engineered in. Hazards and risks engineered out.™

DISCOVER HOW WE'LL IMPROVE THE PERFORMANCE OF YOUR PROJECTS

No two Shermac clients or solutions are the same. So, before we can develop a custom vehicle solution that minimises operational downtime and costs to maximise project productivity and performance, we'll need to discuss your unique technical and budgetary requirements.

INNOVATION STARTS WITH A CONVERSATION

Shermac deliver only the best service and communication during and after sales. We listen, understand and build on our clients requirements and specifications. Talk to one of our well-trained and knowledgeable team to find out more about our customisation process and how we can help you.
