**MULTISERVE SERVICE TRAILERS
THE NEW MTS1500-2**

EXPERIENCE THAT'S DRIVING A NEW ERA IN VEHICLE ENGINEERING

A service solution you can trust” Harsh terrains, long distances with corrugated dirt roads, Dealing with blazing heat or torrential rain, the combination of fine red dust and used oil. All this, and having to meet oil cleanliness standards, stringent environmental regulations and comply with site rules. These are the things we have considered when crafting our new Service Trailer Series.

Shermac combine unrivalled reliability and exceptional safety, providing you with peace of mind and performance.

These service units can be configured with tank sizes and quantities to meet your operational requirements, with a range of optional features.

“

Our new service trailer is an absolute winner, with field maintenance enjoying the reduced scheduled service times as a result of a well- prepared unit

“

The trailers make us look more professional, and because they have everything on board, it allows the team to complete services quickly, safely and without mess

“

It's a much cleaner and easier way to work. Environmentally, this solution reduces the risk of spillage and contamination that may occur when working out of drums

“

Thank you and your team for an outstanding job on the trailer. I am very impressed with the finish and set up of the trailer. It will be a head turner where ever I go from now on

TOUGH, SMART, SAFE AND GREAT VALUE.

Shermac have been designing and building industry-spec service trailers for mining, civil, and commercial operators across Australia and New Zealand since 2002.

We understand with in-field servicing, efficiency is key to business profits. We realise every minute of machinery downtime means money straight off the bottom line.

Which is why our Multiserve service trailers are engineered to meet each client's unique technical specs and servicing requirements, making them an ideal service solution for out in the field.

These trailers are designed and tested to ensure they deliver outstanding performance in even the harshest and most remote environments.

PERFORMANCE. RELIABILITY. FLEXIBILITY.

Our service trailers have been designed to cater to every site situation, and tank capacities can be configured to suit every application. This improves performance by having what you need on board, without carrying around excess product. Also, a range of different products can be carried, such as; oils, diesel, coolant, and water.

We manufacture these vehicles with a range of primary power and delivery equipment, so regardless of your budget, and compliance requirements, the vehicle can be tailored to work for you. This flexibility means you can benefit from the performance of this product, while meeting your compliance, or budget limitations.

These service trailers have been designed to handle the toughest working environments. We extensively tested these units in Western Australia's Pilbara region, where the terrain is harsh, and distances between work sites can be immense.

These refined workhorses are really a true personification of our company credo "Driving Performance Capacity", making them the ultimate on-site service solution for small or large operations.

APPEARANCE

Our Multiserve service trailers boast an aesthetically pleasing exterior, which adds value to your company image, and presents a professional image to the public.

SECURITY

The trailer is completely enclosed, which provides security, and protection of the dispensing equipment from the elements, greatly improving durability.

FLEXIBILITY

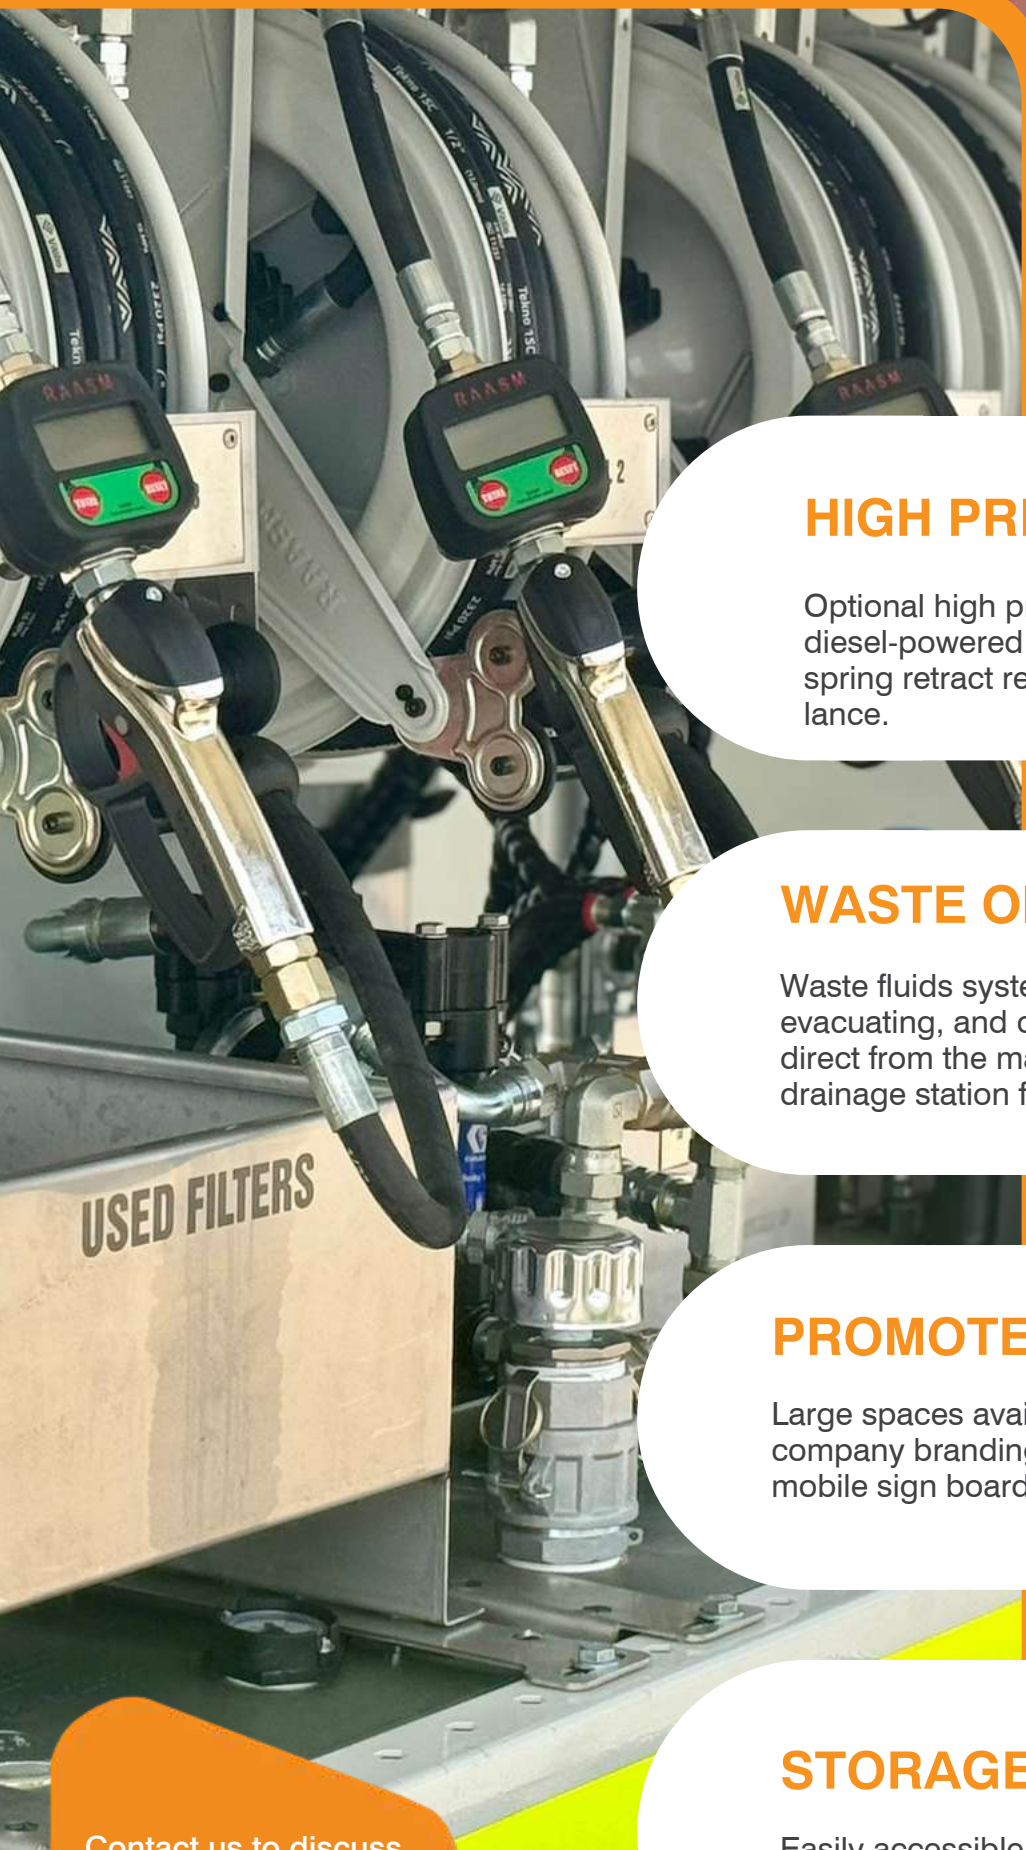

These mine-spec service trailers are engineered to deliver outstanding performance in the toughest mine environments. They are available in 2,000 and 3,500 kilogram gross vehicle mass capacity.

OPERATOR PROTECTION

One-piece, top hinged doors provide the operator with shelter from the sun and rain.
