EXPERIENCE THAT'S DRIVING A NEW ERA IN VEHICLE ENGINEERING

Shermac have been manufacturing engineered-for-purpose service vehicles and water carts for Australia's mining, civil and commercial sectors since 2002.

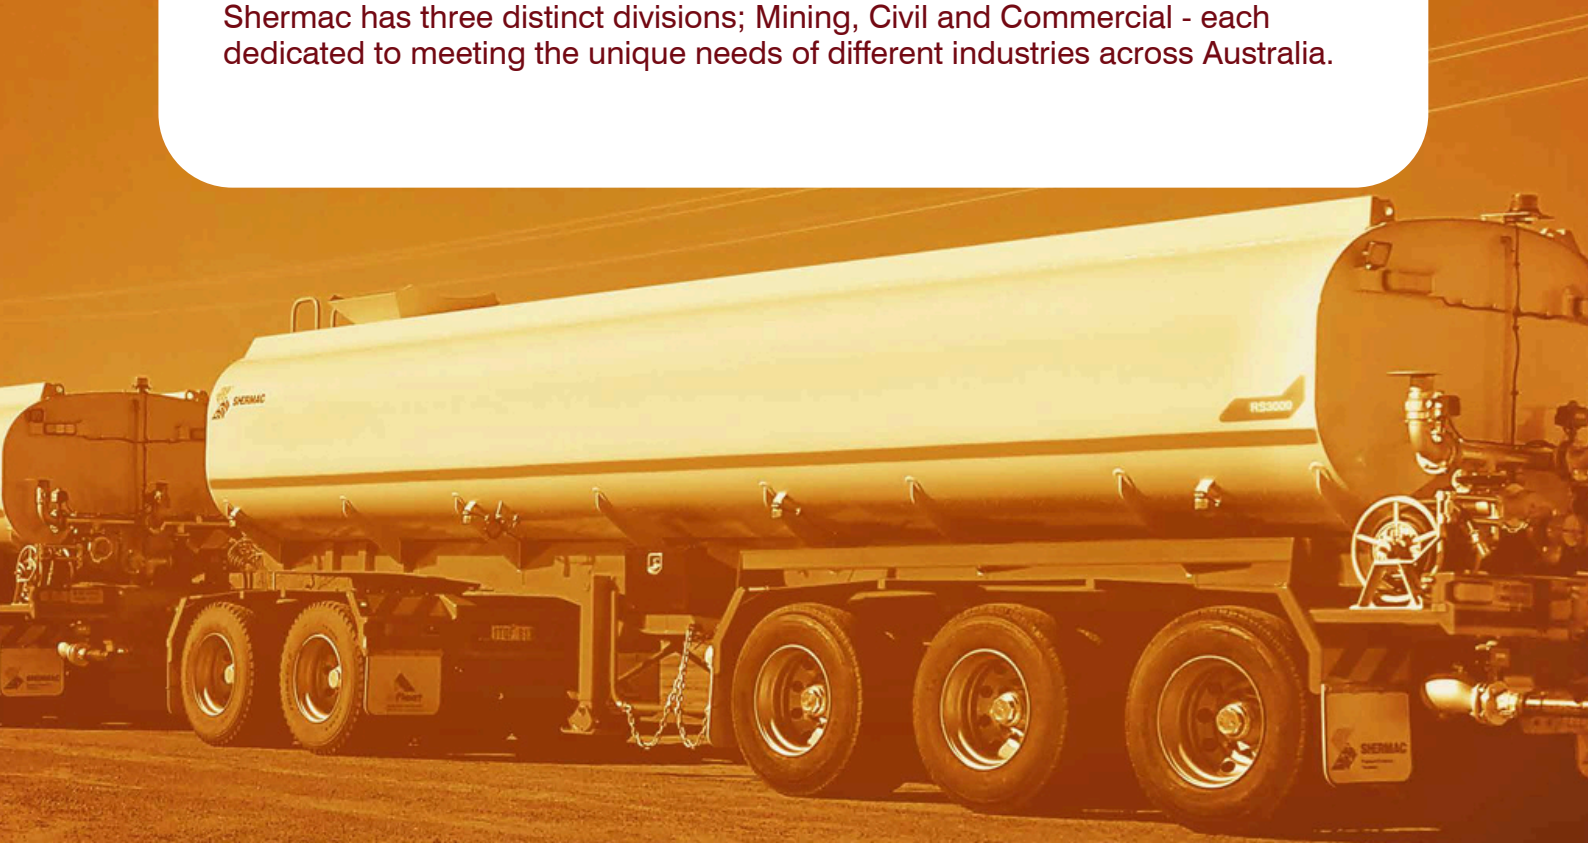

We have earned our reputation for excellence with heavy industry and government organisations alike. But it's not only the quality, reliability and functionality of our high-performance vehicles that have driven our growth and the evolution of our range.

What sets Shermac apart is our design, engineering and manufacturing expertise. However, the most crucial skill in our proven engineering process is the ability to listen, build long-term trusted relationships, and engineer the lowest lifetime-cost-of-ownership vehicles and fleet available on the market.

This is what underpins our expertise in designing and delivering cost-effective, quality-assured solutions that drive performance capacity and add tangible operational and strategic value to your business.

It's the foundation of our global sourcing and procurement network, which gives our clients access to the largest range of high-quality products at the lowest lifetime-cost-of-ownership for fleet and bulk-purchasing prices.

Shermac has three distinct divisions; Mining, Civil and Commercial - each dedicated to meeting the unique needs of different industries across Australia.

THE SHERMAC WATER CART RANGE.

PERFORMANCE. RELIABILITY. FLEXIBILITY.

Shermac is one of Australia's leading manufacturers of water carts for the mining, civil and commercial industries.

Our water carts are built to handle any challenge, and are engineered-for-purpose and extensively tested to ensure optimum weight distribution and performance on any chassis, no matter how tough the challenge or environment.

From smaller on-road water carts, semi's, through to large off-road water carts, all of our water trucks are engineered to your unique technical specifications, giving you the freedom to configure your vehicle from our proven range to suit your exact fleet requirements.

We pride ourselves on being able to offer solutions to our clients, by listening to their needs, and designing and building service vehicles that are configured to suit your operational and budgetary requirements. We help our clients save costs, increase production, and most importantly increase their bottom line with the lowest lifetime-cost-of-ownership vehicles and fleet available on the market.

USABILITY

Our water carts are ergonomically designed to be easy to operate and maintain, with convenient features such as single point greasing and simple spray heads that give a clean, even spray making life easier for operators. All water and hydraulic pipework is externally mounted for ease of servicing.

FLEXIBILITY

Our semi water trucks are engineered to your unique technical specifications giving you the freedom to configure your vehicle to suit your fleet requirements.

SAFETY

Our trucks are built in Australia, to Australian Standards and your specific safety and mine- specification requirements. Optional safety features include fire extinguishers, high-vis tape, wheel chocks, handrails and ladders fitted to access the top of the tank with anti-slip grips, treads and more.

RELIABILITY

Our heavy-duty semi water cart design is engineered to be robust enough for demanding conditions, while providing excellent weight distribution for efficiency.

WATER APPLICATION SYSTEMS

Our water application systems include adjustable left and right batter sprays, horizontal central fan sprays, water cannons, configurable dribble bar options, and scope for additional spray kits.

FULL DRAINAGE

Shermac's semi water carts are designed to ensure the tank can completely drain dry, meaning full tank capacity is used for each load.

SINGLE POINT SERVICING

Our semis are built with a unique single-point servicing feature, meaning there is just one convenient location for all your grease points.

IN-CAB CONTROLS

We offer the option of a conveniently mounted in-cab spray and cannon control panel, providing total operating control from the comfort of the cabin.

SUPERIOR LINING/PAINT PROCESS

Specify your vehicle's colour. We grit-blast and paint our water carts to the highest industry standards, including a two-pack paint system internally and externally, with optional corrosion protection systems for operation in corrosive site conditions.

LOW CENTRE OF GRAVITY

Our water tankers are extensively tested to ensure optimum weight distribution and performance, no matter how tough the challenge or environment. They are designed with a low centre of gravity, for increased stability and safety, offering peace of mind for managers and operators.

WHEEL GUARDS

Our robust rubber wheel guards provide another level of go-anywhere-do-anything protection for our tough and durable semi water carts.

MULTI-COMBINATION COMPATIBLE

Shermac's semi water carts are configured to easily couple any road train setup.

QUALITY COMPONENTS

The components used in Shermac's semi water carts are all procured from Australian suppliers, to ensure they are of the highest quality, and that spare parts are readily available.

OSCILLATING TURN TABLE PLATE

Our tanks are fitted with an oscillating turn table plate, eliminating any torsional stress on the tank.

WATER PUMP

We fit Southern Cross close-coupled pumps to all of our semi tankers. Southern Cross manufacture a quality pump, providing optimum performance.

ADDITIONAL OPTIONS

We provide a range of additional options that enable you to configure the perfect water cartage solution, every time. Options include: work light kits, reverse cameras, hose reels, deep lug tyres, beacons, spare tyre carriers, foam injection systems for water cannons, and more.

FIELD SUPPORT AND MAINTENANCE

Shermac understand the need for maximising efficiency, minimising operating costs, and optimising production uptime. We pride ourselves in delivering complete customer satisfaction, by offering service and support in the field for our engineered-for-purpose vehicles.

We source and stock an extensive range of parts and accessories, all procured from Australian suppliers, ensuring the highest quality. Our long-standing relationships with trusted suppliers means that we are able to negotiate the most competitive prices for you.

We ensure you get the parts you need, when and where you need them.

TESTIMONIALS

“

Outstanding product working in some of the most hostile environments. Fantastic build quality & excellent back up service. Highly recommend the Shermac team.

“

We recently purchased an 8x4 Watercart from Shermac. Couldn't be happier with their service and the quality of the product speaks for itself. Highly recommend.

“

Well built! The trailers supplied were a good solid build.

“

Shermac were professional and knowledgeable throughout the whole quote, design and build process. They were fully accountable for the build and delivered it on time, to budget and with great quality.

“

Shermac design vehicles differently. They have a knack for being able to reconfigure a truck so that, for example, where additional fuel tank capacity but less oil might be needed, they can come up with a design that provides this.

“

Great company to deal with, very professional in all aspects of the contract, superb quality and workmanship, would highly recommend them.

“

*Great People,
Great Service,
Great Product.*

“

The end product was exactly how we hoped it would be delivered. Sales and Production were very easy to deal with, listening to what we required and delivered the product on time, as per quote and built to a quality standard we expected.
